

COVID-19 quarantine management plan

A quarantine management plan (QMP) is required for all requests for exemption as a specialist or essential worker ('the worker')

A specialist or essential worker ('the worker') provides a time critical service in Queensland that cannot be obtained by a person already in Queensland. Employers are recommended to undertake long-term resource and workforce planning that is not dependent on specialist or essential worker endorsements being granted and arrange for the worker(s) to complete 14 days quarantine in government-nominated accommodation prior to the commencement of work. Alternatively, the worker(s) may enter Queensland where an endorsement requires:

1. Quarantine to occur in government-nominated accommodation with an exemption to leave during the quarantine period to attend the worksite (complete PARTS A and C only)
2. Quarantine to occur in employer/business-nominated hotel accommodation with an exemption to leave during the quarantine period to attend the worksite (complete PARTS A, B and C)

Based on the option chosen, complete the relevant part(s) of the QMP. The employer/business must also complete the endorsement page.

Notes on PARTS B and C

- If PART B is not completed, the worker must quarantine at government-nominated hotel accommodation.
- Any quarantine in government-nominated hotel accommodation is at own cost.
- Government-nominated hotel accommodation is available in major Queensland centres and workers must quarantine in the city/town that is within 2 hours of the port of arrival into Queensland.
- Hotel room type is dependent on what is available at time of arrival.
- A worker who performs their specialist or essential services prior to the completion of 14 days quarantine must depart Queensland immediately.
- A worker planning to enter Queensland by road and stop overnight in Queensland before reaching their destination must complete PART B.
- A worker entering and leaving Queensland on the same day is not required to complete PART B.

Completing the QMP

- An employer/business must complete this QMP on behalf of their worker(s).
- Multiple workers may be covered by a single QMP only if they have the same travel, accommodation and workplace arrangements. Where these arrangements differ between workers, each must have their own QMP.
- Persons travelling to Queensland for continuous, long-term employment (i.e. more than three months) are not eligible for exemption as a specialist or essential worker. Instead, they must request to enter Queensland as a new resident.
- All information must be contained within the QMP - do not refer to external documents.

- Allow at least 14 days for the exemption request to be assessed and decided. Each worker on a QMP will be assessed on their own merits and therefore not all workers may be granted an exemption.

Carrying and providing the QMP

- The worker(s) must be provided with a copy of their endorsed QMP. Also, the worker(s) must be advised to carry it with them at all times when in Queensland.
- The QMP must be provided to an emergency officer (public health) upon request.

Mandatory requirements for specialist or essential worker(s) in Queensland

- The worker(s) must comply with all mandatory requirements of this QMP.
- Commencing on their date of arrival in Queensland, the worker(s) must make and retain written records of close contacts for a 14-day period or until they leave Queensland, whichever happens first.
- If directed by an emergency officer (public health) or contact tracing officer, the worker(s) must provide the records to Queensland Health.
- The worker(s) must minimise contact with the community for a period of 14 days or until they leave Queensland, whichever happens first.
- To the extent reasonably practicable, the worker(s) must practice physical distancing. This includes remaining at least 1.5 metres from other people.
- Other than to attend the quarantine accommodation and/or the worksite (and for other limited reasons detailed below, e.g. to be tested for COVID-19), the worker(s) are not permitted to travel elsewhere within Queensland.
- The worker(s) must comply with any relevant requirements under other Public Health Directions and with any relevant protocol approved by the Chief Health Officer.
- must undertake a COVID-19 test, organised by their employer in accordance with the below table:

Specialist or essential worker in Queensland	COVID-19 testing requirements
Worker is in Queensland for 12 or more days	As soon as possible after arriving in Queensland, on day 5, and on day 12 or 13 of the quarantine period
Worker is in Queensland for less than 12 days	As soon as possible after arriving in Queensland and on day 5 of the quarantine period unless the person has left Queensland prior to day 5
Worker arrives by air in Queensland and does not stay overnight	Negative test result within 72hrs prior to arriving in Queensland
Worker develops symptoms consistent with COVID-19	Must isolate and obtain a COVID-19 test as soon as symptoms develop

PART A

Employer/business details

Name	[Title] [First Name] [Last Name]
Address	[Include business/company name, street number, street, suburb, state and postcode] Business name: Street address: State, postcode:
Contact number	[(0X) XXXX XXXX]
Email address	[Email]
ABN/ACN	[ABN/ACN]

Specialist or essential worker details (ensure details for all workers are included)

Name	[Include title, first and last names of specialist or essential worker(s), noting that only workers who have the same travel and work arrangements may be included on the same form] Example: Mr Joe Bloegh Mr Matt Jones
Position/role	[For each specialist or essential worker, describe the position/role they will perform at the worksite, e.g. electrical engineer] Example: Joe Bloegh: Grain harvester (Header) driver Matt Jones: Tractor driver for towed field grain chaser bins
Principal place of residence	[Include street number, street, suburb, state and postcode] Example: Joe Bloegh: 12a Sheridans Bridge Rd, Dubbo, NSW, 2830 Matt Jones: 159 Carmichaels Rd, Dubbo, NSW, 2830
Departure location/port	[xxx] Example: Dubbo, NSW
Arrival location/port	[xxx] – make sure you provide details of the point of entry into Queensland Example: Final destination is “Grainsland”, 22 Fleurs Ln, Condamine Qld 4416– entry into Qld is via the Newell Hwy, crossing at Goondiwindi.
Proposed arrival date into Queensland	[DD/MM/YY] If possible, provide a timeframe of arrival into Queensland. Example: Proposed to arrive at Condamine on the 10 Oct 2021
Proposed departure date from Queensland	[DD/MM/YY] [NB: to be eligible for exemption as a specialist or essential worker, persons must not stay longer than three months in Queensland] Example: Departure date will depend on harvest but likely to be 10 November 2021.
Worksite location(s) in Queensland	[Provide details of each worksite location - including addresses and work itinerary dates] If exact details and itinerary is not known in advance (for example, weather dependent), list all potential properties to be visited and the likely order for work to be completed, for the 14 days of quarantine. Example: Exact order of harvesting on properties is weather dependent. Initial proposal is: 10-20 Oct: ‘Grainsland’, 23 Fleurs Ln, Condamine 21 Oct- 10 Nov – ‘Wheaties’, 1999 Peak Downs Hwy, Condamine

Details of how the worker(s) will be arriving into Queensland

Mandatory Requirements

The specialist or essential worker must:

- enter Queensland via air at an airport as close as practicable to the worksite [where the worker is required to domestically transfer within Queensland, they must stay at government-nominated hotel accommodation, until a COVID-19 test performed in Queensland confirms a negative result]; or
- enter Queensland by road by the most direct route practicable without stopping unless for the purpose of contactless refuelling or to manage driver fatigue [where the worker is required to stay overnight, details of their accommodation arrangements must be provided in PART B]
- If the worker must stop, then they must wear a mask and complete hand hygiene when they enter any public areas. The worker must keep a record of all stops including dates and times spent in public areas.

Example only

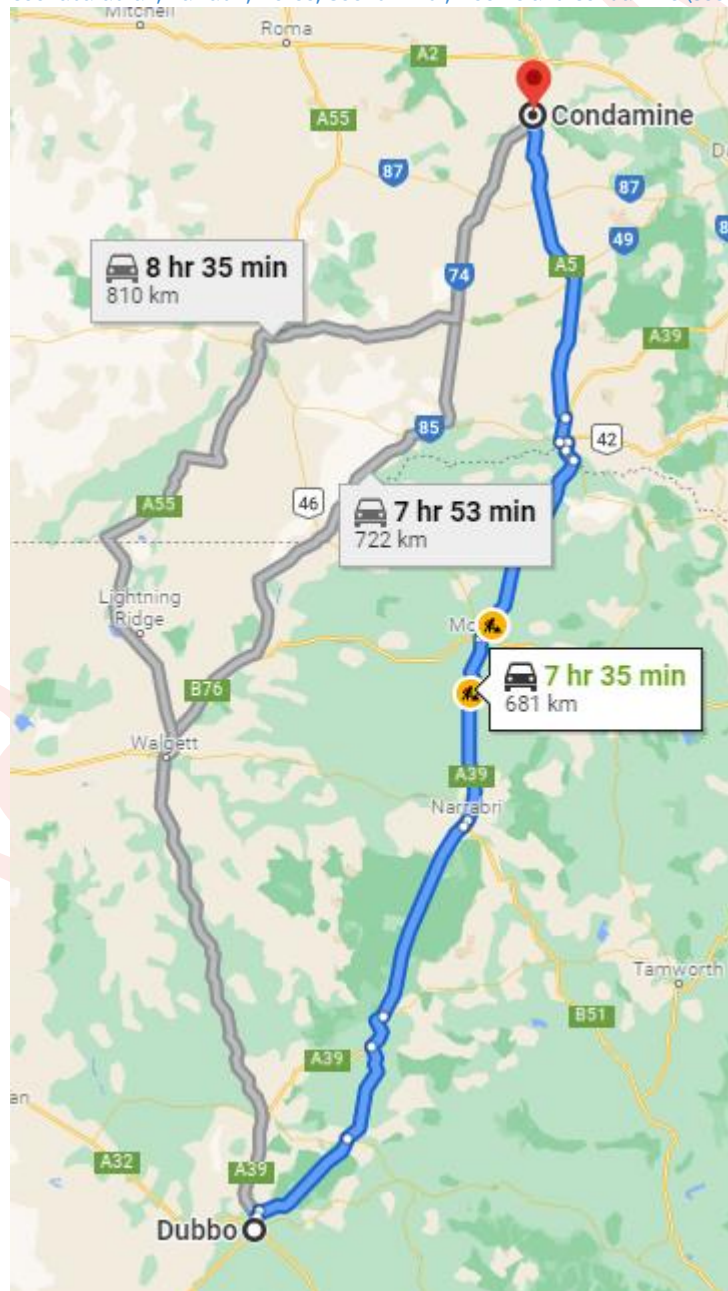

[Include method of transport, flight numbers, border entry location accommodation for any overnight stops if entering Queensland by road]

Include details on:

- How you will meet all the mandatory requirements listed above.
- Details of your travel route, including border crossing point, stopping points, and how you will meet fatigue management requirements. Describe your route in detail (paste a map into the document), including how long it will take on each leg. Include detailed information on how workers will isolate as much as possible at these essential stops.
- How you will record all your stops and times in public areas, for example in a logbook.

Example:

Both Joe and Matt will travel together from Dubbo in their private vehicle (Toyota ute – registration ABC123). We will take turns driving and resting to assist with meeting fatigue requirements every 2 hours. We will travel by the most direct route – through Gilgandra, Coonabarabran, Narrabri, Moree, Goondiwindi, Moonie and Condamine (see the map below).

Plan for Scheduled stops (rest and fatigue management)

While travelling we will not stop unless for an emergency or another reason critical to the completion of the journey, such as to comply with the law, or a mechanical failure. We will carry our own food and drinks to prevent unnecessary stops and interaction with the public.

We will maintain records of all stops for contact tracing purposes (location, time in, time out, places visited and use the Check In Qld app where available).

We will limit movements outside of the vehicle and header.

We will wear a mask and sanitise hands when leaving a vehicle, wear a mask, use hand sanitiser and maintain physical distancing. Wash our hands using soap and warm water whenever possible and use sanitising wipes on surfaces contacted.

We will maintain physical distancing of 1.5 m, comply with all COVID-19 safety protocols required at visited premises, and follow our quarantine management plan.

We will not allow anyone outside the team bubble to enter the vehicle unless critical for the completion of the journey. If this follows we will follow the guideline for unscheduled stops (emergency breakdown)

We will use contactless payment for goods and services, unmanned refuelling sites or outdoor payment terminals (OPTs) where possible. We anticipate contactless refuelling at the IOR Goondiwindi (cnr Glasser St & Hungerford St, Goondiwindi). We will carry enough food for the whole journey.

Unscheduled stops (emergencies or breakdowns)

While travelling, we will not stop unless for an emergency or other purpose critical to the completion of the journey, such as for refuelling, fatigue management to comply with the law, or a mechanical failure. IN the event of an emergency stop or breakdown the attached unscheduled stop guideline will be followed.

We will follow instructions given by the person in control of the vehicle (if not the driver), a Police Officer or an Emergency Officer (Public Health). When outside of the vehicles, we will wear masks. In the event of an unscheduled stop, we will remain inside the vehicle if it is safe to do so.

We will only disembark if necessary one at a time working towards the rear of the vehicle and move safely to an area away from anyone not travelling within the team bubble. Everyone in the team bubble will remain more than 1.5 m from any other person that is not travelling with them. For example, breakdown response/recovery personnel. The person in control (if not the driver) will do a roll call before recommencing the journey. We will practice good personal hygiene and use sanitiser upon entry and exit of vehicle.

If we require an unscheduled repair (onsite or offsite) we will advise the repair or recovery personnel that the vehicle has been occupied by a person who has travelled from interstate and/or is subject to COVID-19 restrictions.

We will ensure repair or recovery personnel wear appropriate PPE such as single use latex or nylon gloves, a surgical mask, disposable plastic aprons and eye protection.

We will ensure that all areas of the vehicle worked on are cleaned (where practicable) using either a product that cleans and disinfects at the same time, or the two-step process firstly cleaning with a detergent and then with a disinfectant (see sanitising equipment below).

We will take all used PPE appropriately at the completion of the work, together with any cleaning materials used prior to or while undertaking the work. Payment for goods and services will be contactless.

If the vehicle cannot be repaired within 3 hours, we will arrange alternative transportation within the convoy for all the people within the team bubble.

If we are required to hire or borrow alternative vehicle, we will clearly communicate to the hire company or owner that the vehicle will be occupied by people who have travelled from interstate and/or is subject to COVID-19 restrictions, have the vehicle delivered via contactless method (have the vehicle and keys left at a specific location) and use contactless paperwork, complete a full sanitisation of the vehicle when we have finished with the vehicle, while wearing appropriate PPE sanitise the vehicle (see sanitising equipment below) before returning the vehicle via contactless methods, and we will keep records of your close contacts (as per mandatory requirements).

PART B

Quarantine Accommodation for specialist or essential worker(s)

<p>Address where the specialist or essential worker(s) will be quarantined</p>	<p>Mandatory Requirements The worker(s) must:</p> <ul style="list-style-type: none"> • quarantine in accommodation that is near as practicable to the workplace • quarantine in non-share accommodation with non-share facilities.
	<p>[Provide name and address of accommodation, dates where there are multiple accommodation locations, and the approximate distance between the accommodation and the worksite or whether the accommodation is on-site] Example: 10-20 Oct: 'Grainsland', 23 Fleurs Ln, Condamine – on-site house cooking and bathroom facilities on site – 500m from principle residence 21-10 Nov – 'Wheaties', 1999 Peak Downs Hwy, Condamine – caravans located on-site with access to separate bathroom facilities (not shared with other workers on site) – 100m from principle residence.</p>
<p>Details of how the specialist or essential worker(s) will be transported to the quarantine accommodation from their port of arrival or from the quarantine accommodation to the worksite</p>	<p>Mandatory Requirements The worker(s) must:</p> <ul style="list-style-type: none"> • travel to their quarantine accommodation/worksite via the most direct practical route without stopping • travel alone or together with any other specialist or essential worker(s) covered by the same QMP in a private vehicle (personal, company or hire car with contactless pick up and drop off arrangements)
	<p>[Outline the transport arrangements] Include details on:</p> <ul style="list-style-type: none"> • your route, including travel time, and that you will use the most direct route • that you will avoid stopping • vehicles including registration numbers you will be travelling in • workers who are travelling together <p>Example: Both Joe and Matt will use their private vehicle (Toyota ute – registration ABC123) to travel to the quarantine accommodation at the worksite on both properties. They will phone ahead before arriving on each property to confirm that they can access the accommodation without coming into contact with anyone.</p> <p>Travel between the on-farm accommodation and the work site will be in their private vehicle without stopping. Only they will use this vehicle to travel to the worksites at each property.</p>
<p>Details of how the specialist or essential worker(s) will be kept separate from other persons at the quarantine accommodation</p>	<p>Mandatory Requirements The worker(s) must:</p> <ul style="list-style-type: none"> • arrange contactless check-in and check-out • be provided with their own, non-share accommodation with separate facilities • avoid all contact with staff and other guests and not use any shared areas/facilities • wear a surgical mask whenever leaving the quarantine accommodation room as permitted below • not leave their quarantine accommodation room other than to: <ul style="list-style-type: none"> • attend the worksite (if this is proposed, PART C of this document must be completed): or • obtain essential medical care: or • avoid injury or illness, escape a risk of harm or in an emergency situation: or • obtain COVID-19 tests to comply with public health requirements; or • leave Queensland by the most direct route without stopping • not permit any other person to enter the quarantine accommodation

	<p>[Outline any other details for ensuring separation from others at the quarantine accommodation]</p> <p>Provide information on ALL accommodation that you will use during the journey, including for any stops on the way. Include details on:</p> <ul style="list-style-type: none"> • How you will meet mandatory requirements listed above, including wearing a mask • Separation of your room / quarters from anyone else at the site – for example, detail that you are staying at a motel with direct access to your room from the carpark, or separate worker accommodation. You should not be staying anywhere that you need to move through indoor public spaces to access your room (e.g. a pub where you need to go inside and upstairs to your room). • That you have your own bathroom facilities, or that they are shared with members of your team travelling together only, and not anyone else at the accommodation. • How you will check in and check out without contacting anyone • That you will not leave the accommodation except for the reasons above. <p>Example: Joe and Matt will comply with the mandatory requirements above, including that they will:</p> <ul style="list-style-type: none"> • only leave the accommodation for work or the reasons listed above • not have contact with any other workers or the general community • wear a mask when entering and leaving the accommodation • not share facilities or accommodation with anyone else • not have visitors at the accommodation • arrange contactless check in and check out. <p>Details for staying on property: Each property has self-contained accommodation for each worker with bathroom and cooking facilities only they have access to. Communication with the farm managers and other harvest workers on the property will be by phone / radio and they will not go into any of the other buildings on the properties.</p>
<p>Details of how food and other essential goods will be provided to the specialist or essential worker(s)</p>	<p>Mandatory Requirements The worker(s) must:</p> <ul style="list-style-type: none"> • be provided with all meals and essential goods by their employer • have all meals and essential goods delivered to their quarantine accommodation or worksite and not attend any restaurants, cafes, food/coffee carts, dining halls, takeaway, pick-up or drive through locations • consume all meals in the quarantine accommodation room or at the worksite • use disposable containers, crockery and cutlery (where available) <p>[Outline arrangements in place for meals] Include details on:</p> <ul style="list-style-type: none"> • How you will have meals / food and other essential goods supplied. You must arrange to have supplies delivered to you. You cannot leave your room to eat in a shared area e.g. a shared dining room, or to pick up takeaway. If deliveries are not possible, you will need to bring sufficient food with you for the 14 day quarantine period. <p>Example: Details for staying on property: Matt and Joe will bring enough food with them for the journey and the first couple of days. At both properties, their accommodation has cooking facilities. The farm managers have agreed to supply sufficient food for the duration of the stay. The food will be placed in the fridge and inside the accommodation before Joe and Matt arrive. If Joe and Matt need extra food or other supplies, they can let the farm managers know by phone, and they will drop the supplies at designated drop off points outside their accommodation when Joe and Matt are at work.</p>
<p>Details of COVID-19 testing arrangement for specialist or essential worker(s)</p>	<p>Mandatory Requirements The worker(s) must:</p> <ul style="list-style-type: none"> • Provide a negative COVID-19 test result prior to being able to leave quarantine for any reason other than: <ul style="list-style-type: none"> - to avoid immediate injury or illness or to escape a risk of harm: or - an emergency situation • Be tested in accordance with the mandatory COVID-19 testing requirements stated above • Prior to testing the testing facility must be notified that the worker is under a quarantine direction <ul style="list-style-type: none"> • Provide details of testing facility and planned days of testing.

	<p>[Outline arrangements for COVID-19 testing schedule to be undertaken, in compliance with the Mandatory COVID-19 testing requirements above, including the testing facility details]</p> <p>Provide information on</p> <ul style="list-style-type: none">• Identify testing locations in the areas you are working, and the dates workers will be tested• Consider organising a private contractor to test staff 'on-site' during travel in the state to reduce contact with general public. <p>Example: Testing will be undertaken on the following days after entry to Queensland – Day 5 (15 October 2021) and day 12 (22 October 2021). The closest testing location to all worksites is the Miles Hospital (5-11 Colamba St, Miles) , which is open at any time by arrangement. Joe and Matt will phone ahead to advise the hospital when they are coming in for a test, and try and avoid busy periods. They will wear a mask at all times and use hand hygiene and follow any other requirements of the testing clinic. They will travel to and from the testing location using their private vehicle (Toyota ute – registration ABC123).</p>
--	--

Example only

PART C

Specialist or essential worker(s) attending the workplace

<p>Detail how the specialist or essential worker(s) will minimise contact with other persons at the worksite</p>	<p>Mandatory Requirements The worker(s) must</p> <ul style="list-style-type: none">• limit interactions with other persons at the worksite, including:<ul style="list-style-type: none">• where practicable, provide a site map of the workplace identifying areas where services are being provided by the specialist worker including pathway/route to and from the area• practice physical distancing by remaining 1.5 meters from other persons• wear a face mask• not use any shared areas (e.g. staff kitchens and break areas)• not share equipment or work spaces unless thoroughly cleaned and sanitised in accordance with Queensland Health guidelines (https://www.health.qld.gov.au/public-health/industry-environment/disease-prevention-control/covid19-industry/covid-19-cleaning-disinfection-waste-management)• use bathroom and dining facilities separate from other persons at the worksite• only be provided single-serve food and beverages in an area isolated from other staff.• use disposable containers, crockery and cutlery (where available)• carry hand sanitiser and sanitising wipes in case of touching shared surfaces (e.g. door handles, chairs etc).
--	---

[Outline the areas at the worksite where the specialist or essential worker will be working, including details of how they will access these areas and who else will be working in these areas. Where practicable, provide a site map of these areas. Also, provide specific details of arrangements for ensuring separation between the specialist or essential worker and the other staff at the worksite]

Include details for each worksite that you will be working at, including:

- how you will meet the mandatory requirements above
- the area where you will be working, and how it is separated from other workers; for example, harvesting in sealed harvester cabins, no contact with truck drivers and all operators will stay in allocated equipment with breaks taken in isolation with all communication conducted via contactless, accommodation well separated from others working on the farm
- Provide information about arrangements for contactless operation, for example, contactless bulk handling operations; and pick-up or delivery if spare parts or servicing is required for equipment.
- That you won't use any shared equipment, or that it will be thoroughly cleaned and sanitised in accordance with the guidelines, both before and after use, in accordance with COVID-19 cleaning principles - <https://www.health.gov.au/sites/default/files/documents/2020/03/environmental-cleaning-and-disinfection-principles-for-covid-19.pdf>.
- How you will get your meals while at the worksite; for example, bring them from your accommodation, or the property manager drops them off to you in disposable containers

Provide a rough map if possible of the property (paste into document).

Example:

The harvest locations are paddocks that are remote from the public and a distance away from the homestead and neighbouring properties. For mechanical bulk handling of grain, workers remain in the sealed cab of the harvester and tractor, allowing physical distancing at all times.

At both workplaces, Joe and Matt will be working in rotation with other harvest drivers on the header and chaser bins (adhering to cleansing protocols between driver change-overs as detailed below). The harvest locations are fields that are remote from the public and a distance away from the principle farm house.

If spare parts are required for the header these will be sourced by the property owners and provided in a contactless manner to Joe and Matt.

We will Sanitise equipment, machinery and vehicles regularly with a two-step process: clean and disinfect with each driver (or user) changeover and at the end of each shift, fully sanitise equipment, machinery, and vehicle, and log each cleaning.

We will sanitise high touch points throughout each shift and after refuelling or rest breaks.

We will use a suitable location for cleaning equipment without interruption.

We will use new PPE (such as single use latex or nylon gloves, surgical masks, disposable plastic aprons) and cleaned reusable goggles.

We will sanitise equipment, machinery and vehicle surfaces by removing and cleaning any spilt food or drink, mud, bodily fluids and walked-in matter, with particular attention to high touch points.

We will use disinfectant wipes or spray with at least 70% alcohol or chlorine bleach, oxygen bleach, or wipes and sprays that contain quaternary ammonium compounds.

When we use disinfectant wipes (wipe-discard-wipe), we will wipe the wet-disinfection-wipe thoroughly across the surfaces area, discard the used wipe safely, wipe the surface using a new disinfectant wipe and leave to dry as long as required by manufacturer.

When we use disinfectant liquid in a spray bottle (spray-wipe-spray), we will spray the disinfectant spray on the surface area, wipe the surface with a disposable cloth, and spray a second time and leave as required by manufacturer.

We will sanitise high touch points including but not limited to: fobs and keys, steering wheels, transmission shifter, and handbrake, internal and external handles, and inner door lining, dashboard controls such as volume and heating knobs, mirror adjustment, window controls, and other control buttons, indicator and wiper stalks, arm and head rests, electronic devices

	<p>(fixed and remote), seat belts and seat release buttons, any frequently touched components on the equipment, machinery or vehicle.</p> <p>To clean the cleaning equipment (such as buckets, mop heads, spray bottles, etc), we will put on new PPE and cleaned reusable goggles, clean the cleaning equipment with a new batch of cleaning and/or disinfectant solution and allow them to dry completely.</p> <p>We will dispose of all used disposable PPE and waste in the general waste bin and ensure solid waste is double bagged.</p>
<p>Details of isolation arrangements should specialist or essential worker(s) display symptoms consistent with COVID-19</p>	<p>Mandatory Requirements If displaying COVID-19 symptoms, the worker(s) must:</p> <ul style="list-style-type: none"> • isolate in their accommodation, wear a face mask and contact the closest fever clinic or 13HEALTH for health advice (or in an emergency, dial 000). • Notify the fever clinic or ambulance that the specialist worker is under a quarantine direction <p>[Outline arrangements/procedures that are in place should any worker display symptoms, including the availability of personal protective equipment, how the worker(s) will be transported, etc] Include details on:</p> <ul style="list-style-type: none"> • Workers will immediately leave the workplace, isolate in their accommodation, and seek medical assistance if necessary • Wear a mask and sanitise • Arrange for a COVID-19 test (specify the location of the Covid-19 testing facility you will use) and isolate until you receive a negative result • Include your company's processes for staff that develop COVID-19 symptoms, including contacting their supervisor or manager to put arrangements in place. • Consider the practical isolation arrangements while working for staff that become unwell or show symptoms of COVID-19; for example how they will access their own separate accommodation and facilities, and receive food and medical attention while isolating from the team. Please also consider how your processes will facilitate multiple unwell workers • Detail the post isolation cleaning process <p>Example: Joe and Matt will undertake daily health checks and report back to a manager/supervisor (name and contact details) who will maintain a record of checks completed. If either worker reports feeling unwell or exhibits COVID symptoms, they are to:</p> <ul style="list-style-type: none"> • Notify their manager immediately • They will put on a face mask and return their accommodation to isolate • They will contact 13HEALTH for health advice • Schedule a COVID test at the nearest Covid-19 testing facility (Miles Hospital, 5-11 Colamba St, Miles) • They will travel alone in the listed private vehicle for this testing • Maintain isolated until COVID results are received <ul style="list-style-type: none"> ○ If Negative – Advise manager and wait for approval to return to work ○ If Positive - Follow directions from local health authority concerning isolation and treatment. Advise manager of positive result <p>In case of an emergency dial 000 and advise the operator that the worker is quarantining having entered from NSW in the last 14 days.</p>

Employer/business endorsement

I hereby certify that the information in this quarantine management plan is true and correct.

I also certify that the specialist or essential worker(s) named in the plan have been instructed to abide by all mandatory requirements therein, subject to or in addition to any different/further conditions which may be imposed in the letter of approval issued by Queensland Health.

I understand that should the worker(s) breach any aspect of this quarantine management plan or the different/further conditions:

- a) their status as a specialist or essential worker will be revoked
- b) they will be required to leave Queensland immediately or after serving an additional quarantine period in government-nominated hotel accommodation, as directed, and
- c) any applicable penalties will be enforced.
