

Guideline for scheduled stops (rest and fatigue management)

While travelling, vehicles should not stop unless for an emergency or another reason critical to the completion of the journey, such as refuelling, fatigue management to comply with the law, or a mechanical failure.

Truck stops, sites without facilities, laybys, etc.

Maintain records

Maintain a record of all stops for contact tracing purposes (location, time in, time out, places visited and use the Check In Qld app where available).

Limit movements

As far as practicable, limit movement outside the vehicle.

Wear a mask and sanitise your hands

If leaving a vehicle, wear a mask, use hand sanitiser and maintain physical distancing. Wash your hands using soap and warm water whenever possible and use sanitising wipes on surfaces contacted.

Maintain physical distancing

Maintain physical distancing of 1.5 m, comply with all COVID-19 safety protocols required at the premises visited (if any), and follow your quarantine management plan or COVID-19 safe plan.

Do not allow anyone outside the team bubble to enter the vehicle

Do not allow any other person to enter the vehicle unless critical for the completion of the journey.

Go contactless

Payment for goods and services should be contactless, whenever possible. Please use unmanned refuelling sites or outdoor payment terminals (OPTs) where possible.
