Fire ants can spread like wildfire.

National Red Imported Fire Ant Eradication Program
MOVING MATERIALS IN SEQ: NEW FIRE ANT ZONES AND REQUIREMENTS ARE NOW IN PLACE.

Fire ants are a serious problem. Just one infected payload can have devastating consequences for our health, environment, economy and outdoor lifestyle.

Help stop the spread of this super pest
New fire ant biosecurity measures are now in place. Please familiarise yourself with the changes so you can play your part in the fight against fire ants at: daf.qld.gov.au/fireantzones

YOU’LL NEED TO APPLY THE NEW BIOSECURITY MEASURES IF YOU MOVE:

- Soil
- Fill
- Clay
- Baled hay or straw
- Potted plants
- Turf
- Animal manure
- Mulch
- Mining/quarry products or by-products
